Summary

Information Science and Engineering undergraduate with hands-on experience building full-stack and AI-powered applications. Strong foundation in backend development, database design, and RESTful APIs, with practical exposure to Flask, MERN stack, and MySQL/MongoDB. Developed real-world systems including financial management platforms and AI-driven analytics tools.

Work Experience and Achievements

Saaskart July 2025 – August 2025
Associate Full Stack Developer

- Assisted in front-end and back-end development tasks across the application stack.
- Collaborated with the team through the full development lifecycle as a first-time intern.

GeeksforGeeks January 2026 – July 2026
Campus Ambassador

- Promoted technical resources and initiatives among students and peers.
- Coordinated events to improve student engagement in technical learning.

Projects

Government Financial Management System GitHub

- Built a full-stack system using **Flask** and **MySQL** for budget allocation, expense tracking, and reporting.
- Implemented secure authentication, role-based access control, normalized schemas, and indexed queries.

Sleep Monitor — AI-Powered App GitHub

- Developed a **MERN stack** application to track and visualize user sleep patterns.
- Integrated an AI chatbot to deliver personalized sleep insights based on user data.

BuyAnyBike — Vehicle Marketplace Platform GitHub

- Designed a responsive vehicle marketplace interface using **HTML, CSS, and JavaScript**.
- Structured frontend logic for scalable features like filtering and listings.

Education

2023 – Present B.E. Information Science and Engineering, **N**ational Institute of Engineering, Mysuru
2022 Maheshwari Public School, Ajmer

Skills

Languages	Python, Java, C, SQL
Frameworks	Flask, React, Node.js
Databases	MySQL, MongoDB
Tools	Git, GitHub, Linux Basics
